

USER STORIES — E-COMMERCE CUSTOMER BEHAVIOR & RFM SEGMENTATION

US01 — RFM Customer Segment View

User Story

As a Marketing Manager, I want to view customers by their RFM segment so that I can prioritize high-value customers and identify customers requiring retention efforts.

Acceptance Criteria

- Every customer must be assigned to an RFM segment.
 - Segment names must be understandable to business users.
 - The dashboard must display the distribution of customers across RFM segments.
 - Users must be able to identify high-value and at-risk segments.
-

US02 — Revenue by Product Category

User Story

As a Product Manager, I want to view revenue by product category so that I can understand which categories are contributing most to overall revenue.

Acceptance Criteria

- Revenue must be displayed for each product category.
 - Categories must be comparable based on their revenue contribution.
 - The dashboard must allow users to identify the highest and lowest revenue-generating categories.
 - Revenue contribution should be presented in a clear visual format.
-

US03 — At-Risk Customer Identification

User Story

As a Marketing Manager, I want to identify customers who are at risk of becoming inactive or lost so that I can prioritize them for customer retention activities.

Acceptance Criteria

- At-Risk customers must be clearly identifiable from other customer segments.
- At-Risk customers must be distinguishable from Lost Customers.
- The dashboard must provide visibility into the size of the At-Risk segment.
- Users must be able to filter the analysis to focus on relevant customer segments.

US04 — Membership Tier Performance

User Story

As a Product Manager, I want to compare customer and revenue performance across membership tiers so that I can evaluate differences in customer behavior between membership levels.

Acceptance Criteria

- The analysis must include all available membership tiers.
 - Users must be able to compare performance between tiers.
 - Revenue and relevant customer KPIs must be available for comparison.
 - The dashboard must provide a clear view of membership tier performance.
-

US05 — Geographic Revenue Analysis

User Story

As a Sales Team Lead, I want to view revenue by city so that I can identify the strongest-performing markets and prioritize business efforts accordingly.

Acceptance Criteria

- Revenue must be available for each city in the dataset.
 - Cities must be comparable based on revenue performance.
 - Users must be able to identify high- and low-performing cities.
 - The dashboard must provide a clear geographic revenue comparison.
-
